Huck Guns provide hydraulic force to install huck bolts or rivets.

Bridges, CPP, Rail, Construction, Screens. Vibration Solutions.

These tools use Hydraulic pumps to extend the huck tool piston. This in turn pulls on the huck rivet until the tail disconnects. Just like a pop rivet gun but powered. Simply place the tool nose over the huck bolt, pull the trigger and remove after the tail shears off. The pump has preset pressures that do all the work. Nothing to set or monitor as the tail separates once the designed force is archived. Popular users include Metso, Ludowici, Schenck and Auri.

HUCK TOOLS - Hire & Sales				
Huck Tool	Part	Type	Imperial	Metric
	61900	Huck Tool - Standard	5/8"	16mm
	61901	Huck Tool - Standard	3/4"	19mm
	61902	Huck Tool - Standard	7/8"	22mm
	61903	Huck Tool - Standard	1"	25mm
	61904	Huck Tool - Standard	1-1/8"	29mm
HUCK GUNS - Off Set				
Huck Tool - Off Set	Part	Type	Imperial	Metric
	61905	Huck Tool - Off Set	5/8"	16mm
	61906	Huck Tool - Off Set	3/4"	19mm
	61907	Huck Tool - Off Set	1"	25mm
There are 2 main types of tools. Standard & Off Set. The offset tools are shorter & specialized, suited to tight access. Off set tools are less suited to multiple usage, or production.				
Equipment is normally supplied with a Tool, Pump & 8m hose set. Pumps can be driven by 240 Volt or Compressed Air.
