RAD Air Nut Runners - Perfect solution to ensure correct torque for bolting. Improve **Safety**, apply a known **torque value** - decreasing downtime **Fast - Easy to use** not complicated - Full power in reverse for **loosening** tight nuts - **no electricity** required. RAD Pneumatic torque Tools use shop air 60 to 100 psi (25-35 cfm) To set the torque simply adjust the air regulator, **full torque control**, set and forget the tool will stall when torque is reached. The RAD torque tools replace rattle guns and torque multipliers - **No need for any more guessing or risk taking during maintenance.** TJ Tools servicing Australia offering simple affordable torque solutions.
